

There's no one-plan-fits-all solution when it comes to CSG exploration and production. Each project and program is different; each landowner has different expectations and needs. We've found the only way to make sure everyone gets a fair go is to sort through these differences together.

Building Partnerships

We employ a team of dedicated Landowner Liaison Officers to help guide property owners through the CSG exploration and production process.

These people – who live in the local area – seek to fully understand the nature of individual properties including future business plans and current land use.

Working Together

We promise to:

- Be open, honest and trustworthy in our dealings with you and we will consistently deliver on our commitments

- Strive to achieve fair and mutually beneficial outcomes in all our dealings with you
- Build and maintain positive working relationships with you to ensure the coexistence of sustainable agriculture and gas production over the long term
- Always be available to listen and discuss any questions or concerns you may have on specific matters

We will look to develop business-to-business opportunities which will deliver mutually beneficial outcomes to both parties wherever possible.

ConocoPhillips

APLNG is a CSG to LNG Joint Venture between Origin and ConocoPhillips
